

# ARTiPLAQ Style Terminology

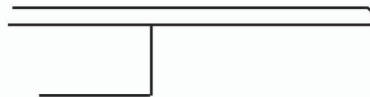

## Plaq mount

The '**Plaq mount**' is our standard offering: your print mounted to a solid 3/8" thick board MDF, the edge finished with either a 'Standard Bevel' or 'Micro Bevel' with your choice of edge color. Profiles shown below:

## Float mount

Your print is mounted to 1/8" masonite. The edge is finished with your choice of colors. A hollow frame is fixed to the back of the plaq and inset a few inches from the edge so when hung on the wall, the frame is not visible. Your print will appear to float 7/8" off the wall. (The weight of a Float mount is less than half the weight of a 'standard plaq mount' of similar size.)

## Box mount (aka Flush mount)

The Box mount, also known as 'Flush mount' has a thick 7/8" profile off the wall. (Visualize a shoebox cover on the wall.) Your print is mounted on 1/8" masonite and a hollow frame is fixed to the back of the plaq, flush to the back edge. The edge is finished in your choice of colors, (Similar to the Float mount, the weight of the box mount is less than half the weight of a standard plaq mount of similar size.
